

Georgia Hando

Interior Designer

Profile

I have spent the past year developing my skills and project range at ThomsonAdsett after completing a Bachelor of Interior Design (Commercial) in 2021. While I have been at TA I have been creatively challenged and had the chance to develop my conceptual design and revit skills. I've been able to work collaboratively on concept proposals, presentations and documentation, and have gained communication and client liaison experience.

Before joining the TA team, I spent a year working in residential interior design as well as a lead property stylist, gaining experience in concept design and FF&E selection and installation.

I am seeking a role within a company with whom I can grow further and help mold me into a better designer. A company where I can put my creative and strong work ethic to good use.

Experience

THOMSONADSETT | 2021 - PRESENT
